

# VMD105

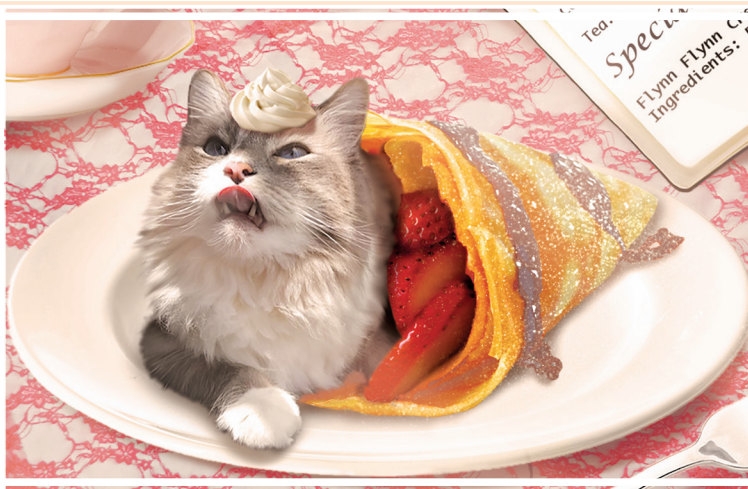

## About Me

My name is Keanna. I took VMD 105 because I wanted to expand my knowledge in different art programs to improve and sharpen my skills for my future. I want to pursue an art career and I believe this can be one of my first step towards my goal. The main typeface I used in this project was Rockwell and I chose a peachy color as the background color because I wanted this portfolio to mimic a photo book like the memories I collected in this class so far!

# Cat Cafe

## Cat Cafe

The cat model inside the crepe is actually my cat named Flynn! I got the inspiration when I took a picture of him a few months ago, on an app called "Snapchat", and drew him inside a crepe for fun. I realized that I could use the picture as my reference, so I decided to go with that idea. It was a great decision because I really loved how it came out in the end. Unfortunately the CMYK version really muddled out a lot of the brighter colors so if I could redo it I would pay closer attention to the color pallet that I used.

# Happy!

## Happy!

The character I drew in this project is from a very popular anime called Fairy Tail. His name is called Happy. I chose to illustrate him because I wanted to do something simple, but not too simple. I was sitting in my room one day, and saw him in one of my posters and I realized his design was perfect, so I decided to draw him! I was going to include his friend in the picture too, but was unable to do so due to time constraints, but I think it still came out really nice!

# Lonely Ghost

## Lonely Ghost

The legend goes that the ghost is still looking for his friend. Just kidding. He did find a friend but scared him away sadly. The idea for the story came after I was inspired by a video I saw online of two ghosts singing, so I wanted to create something with a ghost too. However, the final animation didn't play out as well as I thought it would in my head, but I think the project went well for my first time working with Adobe Animate.
